

# SAVE ENERGY

## IN NEW PRAGUE

Purchase electricity at a reduced rate by participating in one or more of the following Save Energy In New Prague Programs.

### How it works

Two installed electric meters will track your energy use. The first meters regular household appliances at the standard kWh rate. The second off-peak meter tracks specific equipment at the discounted rate.

There is NO additional monthly meter charge for the second meter.

### Get Started

1. Call us at 952-758-4401 for a site visit.
2. Hire a licensed electrician at your own expense to connect qualified equipment to the off-peak meter, install a dual meter socket and a load control switch. The cost for this installation will vary.
3. After the load control switch and other equipment have been installed, you or your contractor should call 952-758-4401.
4. New Prague Utilities will install the second meter at no cost to you.

## Electric Heating

Electric Heating Equipment that qualifies for the Save Energy In New Prague Program.

◆ Baseboard heaters

◆ In-floor heating

◆ Wall heaters

◆ Cove heaters

◆ Plenum heaters

◆ Garage heaters

*New Prague Utilities has King Electric Heaters available for \$650.00.*

### ELECTRIC RATES

#### Metered Rate

Winter .0696kWh (Oct-May)

Summer .0823/kWh (June-Sept)

### ENERGY SAVING TIP

Turn your thermostat down to 68 degrees.

A one degree difference can cut your electricity usage by 3%.
