May 10, 2024 | Project Update No. 21

This letter is being sent to inform you of construction activity on the above-referenced project.

Holtmeier Construction has been raising manhole castings and gate valves to their final elevation in advance of final bituminous paving. Prior to placing the blacktop, an oil tack coat will be placed to improve adhesion to the surface and curb face. The paving contractor is scheduled for Wednesday, May 15th, to place the final lift of blacktop along with the tack oil. Rain may potentially alter that schedule.

As this is the final placement of blacktop, we ask residents limit parking and sharp turns on the pavement as both may damage the surface until it has cooled. As temperatures won't be too hot next week, it should be suitable for street parking the day after placement.

Punchlist item repairs are likely to occur this spring and early summer. This is likely to include some repairs to concrete cracks in curbs, driveways, and sidewalks. Overseeding of some grass boulevards is also expected to improve growth.

This will be the last project update emailed. A text update will be sent out a day before paving as a reminder for those of you on the text update list.
